Fabien Molinet
31b, rue d'Ebersheim
67600 Selestat,
France
fabien-molinet.fr
Nationality: French

Consultant / Software Developer

Proficient .NET, Developer specialising in C#, ASP.NET and SQL Server with nearly 6 years of professional IT experience. With many .NET applications developed in production within public and private enterprises, I am able to exhibit the abilities required to accomplish an array of projects. My main technical qualifications are listed below:

- Object Oriented Programming, UML/Merise modeling
- Client/Server Programming, n-Tier Architectures, Multi-Threaded applications
- Development and design of .NET applications (C# or VB.NET), Winform and Web (ASP.NET)
- Development and migration of VBA code to VSTO
- HTML, CSS, Javascript (see some of my articles), XML, XSL
- Microsoft SQL Server, TSQL, query optimisation, Oracle, PL/SQL
- Design of reports (Reporting Services, Active Reports or Crystal Reports)
- Some web development using PHP5, Zend Framework, JQuery, Prototype, Doctrine

Background and Education

- Born 14 June, 1985, and currently living in Selestat, France
- IT work experience since 2005
- Bachelor of Computer Science, University Robert Schuman, France
- Certification Microsoft SQL Server 2005 (70-431)
- Training on Jahia (JSR168 portal and CMS) by Jahia Ltd firm

Languages

- English: Fluent
- French: Mother tongue

CRM software engineer

(since April 2011)

Analyst in a marketing context

Hager, Obernai, France

- Work on the integration of Pivotal CRM with SAP: work with other Hager teams, development of specifications, implementation. Development of a RFC Layer: RFC Client, RFC Server, caching and dynamic (SAP .NET connector, multi-threading, custom caching, C# 3.5, Linq, lambda expressions and Log4net)
- Creation of Exchange appointments/tasks and their corresponding items in the CRM via BlackBerry. (Kerberos delegation, .NET 3.5, WCF, JQuery and WebDav calls)
- Complete redesign of the relations in the CRM: development of the specifications, implementation and data migration for all markets to conform to the new development (C# 3.5, Linq, Pivotal CRM, T-SQL).
- Work on the performance field: rewrite of TSQL, rewrite of code logic, analysis of execution plans, use of the SQL Server Profiler and Tuning Advisor, many useful indexes and statistics added. Creation of a replicated database, using transactional replication, for reporting and business analysis (production database is now way less loaded).
- New functionalities and reports added to the CRM (C# 3.5, Reporting Services, Pivotal CRM)
- Sharepoint configuration and new content added (Sharepoint, ASP.NET, C# 3.5)

Development on 42™ product

Northern Arch, Christchurch, New Zealand

- Implementation of customer requests. Working with design team and QA team, new functionalities have been developed: business logic modified, data access, screens and testing added (C# 4, Lambda Expressions, Linq, Winform, TSQL, PL-SQL).
- Proactive, some ideas proposed to improve 42™ have been implemented
- Work on performance issue: rewrite of TSQL, PL-SQL and code logic
- Work on UI improvements: automatic exception handling from the business logic to the UI using lambda expressions, reflection and user controls
- Rework of some parts of the core to use generics and interface co-variance (C# 4)
- Unit testing using NUnit and Resharper

T&S Consultancy - Project Samples

(August 2008 - May 2010)

Analyst in a customer relations context

Credit Mutuel Group, Strasbourg, France

- CRM Pivotal 5.9 expertise (C#, VBScript): many screens added/modified and computer telephony integration
- Web pages integrated to the CRM (ASP.NET) and some AJAX based (jQuery, ASP.NET, Web services)
- CTI/Telephony banner used by advisers and their supervisors (C# 3.5, COM Interop, multi-threading)
- Proxy supplying statistics to advisers (C# 3.5, multi-threading)
- Set up of PL/SQL and Oracle statements using TOAD for a future application

Analyst in a marketing context

Hager, Obernai, France

- Setting up multimarket, key performance indicators, dashboard, sales objectives and system follow up using CRM Pivotal 6. Client/Server in C#, ASP.NET, SQL Server 2005 (triggers, stored proc, functions, views, ...)
- Reporting Services: reports designing and response times optimisation
- Applications and web services development to interact with firm's software packages

Project manager (VBA to VSTO migration)

De Dietrich, Zinswiller, France

- Scheduled and assigned tasks to a five persons team
- Coordinate and followed achieved work
- Formed team members to Visual Studio Tools for Office technology (VSTO)

O.O.P. and .NET trainer

Clestra, Strasbourg, France

- Trained IT team to basic object oriented programming and to the .NET framework

Analyst in an industrial context

Capsugel, Colmar, France

- Interaction with equipment in .NET (serial link and NPort development): industrial scales, spectrographs ...
- Analysis, development and debug of applications and libraries (VB.2008, ERP Protean)
- Migration of applications using ERP Protean from C# and VB6 to VB.NET 2008
- Reporting using Active Report
- Testing and logging layer added to applications (VB.NET, Log4net)
- Visual Studio: database projects, automated setup packages (.msi)
- Deliverables execution (specification and installation documents)
- Test campaigns executions in order to validate softwares (FDA requirements)

Bill checker development

Knauf, Wolfganzen, France

- Parse and check PDF files containing numerous bills (C#, PDFBox)
- Many new appenders done to improve logging (Log4net)
- Office macro migration from VBA to Visual Studio Tools for Office (VSTO, C#)

Bull Consultancy - Project Samples

(August 2007 - August 2008)
