

Select Fix 0.26 is out !

06-07-2008

With the new release of Select Fix :

- you should be able to use paddings on the floating item (evolution)
- you should be able to use any kind of border : css class, inline, only left border, ... (evolution)
- you should be able to call the item by its ID (regression fixed)
- you shouldn't have anymore width/height problems on the floating item (regression fixed)

You can download the new version [here](#)
