

## Select Fix 0.28 is out !

08-07-2008

With Select Fix 0.28 if you resize your floating items they will still be fixed from SELECT tags.

(The IFrame, used to fix the floating item, will resize itself automatically).

If you wan't this function you'll have to set the `autoRepairFloatingElements(time_in_milliseconds)`.

Please take a look at the examples in the archive, it's very easy to implement this.

You can download Select Fix 0.28 [here](#) !
